Professional Summary

Results-driven UX Researcher and Release Manager with a passion for gaming, process optimization, and problem-solving. As the first and only UX designer at Fast Travel Games, I established UX research practices, managing over 40 playtest projects across multiple VR games. I specialize in conducting usability and sentiment playtests, analyzing data, and delivering actionable recommendations to enhance user experiences.

Currently, I am responsible for Release Management, ensuring smooth game launches across multiple platforms by coordinating teams, navigating certification processes, and managing store setups and updates. Adept at managing multiple projects simultaneously, I thrive in fast-paced environments and excel at cross-functional collaboration. I am eager to apply my expertise in any type of project management role that challenges my problem-solving abilities.

Skills

- **UX Research & Design:** Qualitative & Quantitative Research, Usability Testing, Sentiment Analysis, Wireframing, User-Centered Design
 - **Project & Release Management:** Agile Methodologies, Jira, Asana, Notion, Process Optimization, Cross-Team Coordination, Storefront, Launch & Patch Management
 - **Gaming Industry Expertise:** Virtual Reality (VR), UX Research (UXR), Platform Certification, Store Management (Steam, PlayStation, Meta, Pico, SideQuest)
 - **Technical Tools & Adaptability:** Proficient in Figma, Miro, Jira, Asana; quick to learn new tools and processes
 - **Languages:** Swedish (Native), English (Proficient)
-

Professional Experience

Fast Travel Games | Key Contributions

- Established and refined the UX Research Process
- 40+ UXR projects for 12+ games across multiple genres and platforms
- 200+ qualitative playtest sessions and 10+ quantitative tests
- Created guidelines to avoid common design pitfalls
- Implemented tools & processes for both UXR and Release Management
- 20+ teams collaborated with, across design, dev, and marketing
- Managed 19+ games simultaneously from store setup to post-launch
- 5 platforms used including Meta Quest, Steam, PlayStation, and others.
- 4 successfully handled launches across multiple platforms.

Fast Travel Games | Release Manager

- Led store management and certification processes for Steam, PlayStation, Meta, Pico, and SideQuest.
- Oversaw game releases from store setup to post-launch support, including wishlists, early access, beta testing, pre-orders, and patches.
- Coordinated cross-functional teams across platform, marketing, and development to ensure smooth product launches.
- Ensured games met platform compliance and quality standards, handling age ratings, system requirements, and asset management.

Fast Travel Games | UX Designer & Researcher

- Developed and implemented UX research processes, guidelines, and best practices.
 - Conducted qualitative and quantitative research, including usability and sentiment playtests, surveys, and player behavior analysis.
 - Produced in-depth research reports with actionable recommendations to optimize game design and player experience.
 - Managed multiple concurrent playtest projects, ensuring timely delivery of insights and improvements.
-

Education

UX Design | Changemaker Educations

- Specialized in UX & Game Thinking, Game Psychology, Game Design, and Gamification.

Full-Stack Development | Craft Academy

- Completed an intensive three-month bootcamp in programming and project structuring.
- Focused on learning programming methodologies rather than specific languages.

- Gained hands-on experience with Agile methodologies, TDD, BDD, CSS3, HTML5, JavaScript, Ruby on Rails, Angular, and Ionic.
 - Completed a three-month internship as a programmer and event coordinator.
-

Projects

At Fast Travel games, I have been involved in over 19 games.

Mannequin (UX Research & Release Management)

- Managed UX research and release processes, guiding the game from early development to Beta Testing, Early Access, and Full Launch.
- Platforms: Steam, Meta

Band Space & Action Hero (UX Research & Release Management)

- Led full-cycle release management, from announcement to post-launch support.
- Platforms: Steam, Meta

Blind Accessible Traversal System (UX Research & Design)

- Designed an accessible traversal system for blind players in the sandbox MMO Pax Dei.
- [Project Link](#)

Challenge System (UX Research & Design)

- Developed a challenge system for the rogue-lite MadShot, balancing engagement and accessibility.
- [Project Link](#)

Lemonade Apocalypse (UX Research)

- Conducted playtests and provided UX design for an incremental clicker exploring economic growth.
 - Part of a four-person team during the Game On Skill Up mentorship program.
 - The game gained over 100,000 players and holds a 95% positive rating on Steam.
